Abstract

This is a sample sentence that should look like normal text, and this is another. This is a sample sentence that should look like normal text, and this is another. This is a sample sentence that should look like normal text, and this is another.

This is a sample sentence that should look like normal text, and this is another. This is a sample sentence that should look like normal text, and this is another.

Computing Reviews (1998) Categories and Subject Descriptors:

A.0 Example Category
C.0.0 Another Example

General Terms:

thesis, example, another example, still more examples, more and more examples

Additional Key Words and Phrases:

example, an example phrase with many words

Acknowledgements

This is a sample sentence that should look like normal text, and this is another. This is a sample sentence that should look like normal text, and this is another. This is a sample sentence that should look like normal text, and this is another.

Contents

1	Reinforcement Learning	1
1.1	Markov Decision Process	1
1.2	Partially Observable Markov Decision Process	1
1.3	Dynamic Programming	1
1.4	Reinforcement Learning Methods	1
1.4.1	Temporal Difference Learning	1
1.4.2	Q-Learning	1
1.4.3	Adaptive Heuristic Critic	1
1.4.4	Prioritised Sweeping	1
1.4.5	Policy Gradient Methods	1
1.5	Classification of the Regarded RL Problems	1
1.5.1	High-Dimensionality	1
1.5.2	Partial-Observability	1
1.5.3	Continuous State and Action Spaces	1
1.5.4	Data-Efficiency	1
2	Recurrent Neural Networks	3
2.1	Feedforward Neural Networks	4
2.2	Recurrent Neural Networks	4
2.2.1	Finite Unfolding in Time	4
2.2.2	Overshooting	4
2.2.3	Dynamical Consistency	4
2.3	Universal Approximation	4
2.3.1	Approximation by FFNN	4
2.3.2	Approximation by RNN	4
2.4	Training of RNN	4
2.4.1	Shared Weight Extended Backpropagation	4
2.4.2	Learning Methods	4
2.4.3	Learning Long-Term Dependencies	4
2.5	Improved Model-Building with RNN	4

2.5.1	Handling Data Noise	4
2.5.2	Handling the Uncertainty of the Initial State	4
2.5.3	Optimal Weight Initialisation	4
3	Prior Arts of Combining RNN and RL	5
3.1	Neural Actor-Critic(idasi's group)	5
3.2	LSTM with POMDP objective function	5
3.3	PhD thesis, by Remi Coulom ?	5
3.4	DQN?	5
3.5	Hybrid Approch(RL with RNN)	5
3.6	Recurrent Models of Visual Attention?	5
3.7	stanley gecco021 2002?	5
4	Experiment	7
4.1	RNN(LSTM) Implementation	7
4.2	Cart-pole Balancing Simulator	7
4.3	Learning a task of stacking wooden blocks	7

Chapter 1

Reinforcement Learning

1.1 Markov Decision Process

1.2 Partially Observable Markov Decision Process

1.3 Dynamic Programming

1.4 Reinforcement Learning Methods

1.4.1 Temporal Difference Learning

1.4.2 Q-Learning

1.4.3 Adaptive Heuristic Critic

1.4.4 Prioritised Sweeping

1.4.5 Policy Gradient Methods

1.5 Classification of the Regarded RL Problems

1.5.1 High-Dimensionality

1.5.2 Partial-Observability

1.5.3 Continuous State and Action Spaces

1.5.4 Data-Efficiency

Chapter 2

Recurrent Neural Networks

2.1 Feedforward Neural Networks

2.2 Recurrent Neural Networks

2.2.1 Finite Unfolding in Time

2.2.2 Overshooting

2.2.3 Dynamical Consistency

2.3 Universal Approximation

2.3.1 Approximation by FFNN

2.3.2 Approximation by RNN

2.4 Training of RNN

2.4.1 Shared Weight Extended Backpropagation

2.4.2 Learning Methods

2.4.3 Learning Long-Term Dependencies

2.5 Improved Model-Building with RNN

2.5.1 Handling Data Noise

2.5.2 Handling the Uncertainty of the Initial State

2.5.3 Optimal Weight Initialisation

Chapter 3

Prior Arts of Combining RNN and RL

- 3.1 Neural Actor-Critic(idasi's group)
- 3.2 LSTM with POMDP objective function
- 3.3 PhD thesis, by Remi Coulom ?
- 3.4 DQN?
- 3.5 Hybrid Approach(RL with RNN)
- 3.6 Recurrent Models of Visual Attention?
- 3.7 stanley gecco021 2002?

Chapter 4

Experiment

4.1 RNN(LSTM) Implementation

4.2 Cart-pole Balancing Simulator

4.3 Learning a task of stacking wooden blocks

This is a sample sentence that should look like normal text, and this is another. This is a sample sentence that should look like normal text, and this is another. This is a sample sentence that should look like normal text, and this is another.

Theorem 4.1 *This is a sample sentence that should look like normal text, and this is another:*

$$y = x + 3$$

Proof. This is a sample sentence. \square
